SHOWER / STEAM UNITS

Boundless Possibilities. Boundless Beauty.

At PRL, we take the guesswork out of building stunning complete and custom shower systems. Supplying everything you need to design a frameless shower door unit, we're your one-stop-shop for customizing awe-inspiring complete shower enclosures.

Manufacturing complete shower units in-house, we can fabricate practically any custom shower configuration for frameless shower door sliders and swing door enclosures. At PRL, the sky's the limit. Imagine the possibilities!

PLEASE NOTE: PRL continuously improves product design and performance. We reserve the right to make changes without notice.

SPLASH PANEL

POINTS TO CONSIDER

- When designing a shower unit three factors one must consider: total height, total width and total square area.
- The majority of frameless shower units and sliders are assembled using 3/8" and 1/2" Glass thickness
- The width and weight limitations for sliding and swinging operable doors are determined by the specifications on the selected hardware. See specifications per PRLs hardware limitation that must be followed
- Maximum recommended height and width,

(A) Height - when two vertical or horizontal edges are supported
-Maximum for 3/8" glass is 84 inches
-Maximum for 1/2" glass is 120 inches

(B) Width
- Maximum for 3/8" glass is 30 inches*
- Maximum for 1/2" glass is 36 inches*

There are several ways to safely secure the fixed panel from which the door will hinge. One way is to attach the fixed panel to a ceiling, securing the top and bottom edges of the glass (*Support Elements page 60*). Another method is to use a Header extrusion across the top of all fixed panels (*Headers page 62*).

*Door width only

Shower Unit with Brushed Nickel U-Channels

90 Degree Steam Unit with Heavy Duty Short Plate Sydney Hinges

SUPPORT ELEMENTS

Safety should be the main priority while installing a frameless shower unit. PRL SD Units are strengthened by a variety of exposed support elements that provide an alternative for a clean frameless appearance.

Shower Unit with Black Matte Aluminum Header and Sade Hardware

Steam Unit with Polished Chrome Header

Shower Unit with Black Matte Aluminum Header

ALUMINUM HEADER

U-CHANNELS

All support elements include applications for:
Header: Wall Mount , 90° Units, 135° Units & In-Line Sections
Clamps :Surface Mount, 90°/135°/180° Fixed Glass to Glass,
135° Units, 180° Units, Tilt Transom & Fixed Sidelite

Available finishes Headers / U-Channels,
• Bright or Brushed Dip Clear
• Oil rubbed bronzed
• Matte Black

SUPPORT ELEMENTS:

- They are intended to provide Structural integrity to the unit
- Header must be used for safety and functionality support.
- It carries the extra support as the door functions or moves
- Supporting the size and weight of the sidelite panel itself.

U-CHANNELS

Aluminum u-channels for securing fixed panels of glass to the wall, ceiling, or floor, include our channel with notched bottom for greater installation strength. All screws should be glazed with clear silicone to prevent water infiltration. Standard 95", 98" and 144" (2.49 M) lengths.

COATED SHOWER GLASS

Unlike sprayed-on coatings, Shower Glass coating is fused to the glass during manufacturing, sealing the glass surface to provide a lifetime protective barrier. With regular maintenance shower enclosures with Shower Glass will maintain their beauty and clarity for many years to come

Lab tests put Shower Glass and uncoated glass in a “jungle box” torture test that simulates years of heat and humidity exposure. After only 175 hours in this test, uncoated clear glass started to show signs of haze and was significantly stained at the end proving that shower glass stays cleaner longer

Frameless Shower Unit with Shower Glass

Custom Steam Unit with Shower Glass

DIAMOND SEAL

DIAMOND SEAL

Want to protect and keep your shower looking radiant? We've got your back. PRL offers Diamond Seal shower glass coating. This protective coating will keep your shower and bath looking gorgeous and easy to maintain. What more could you ask for? Diamond Seal improves the clear bright and sparkling new glass appearance. Resists staining and discoloration caused by limescale & hard water stains. Maintenance is simple since washing is cut in half with a squeegee.

Contact the coating manufacturer for appropriate cleaning instructions. Coatings can be damaged by using unapproved a cleaning products. NOTE: Diamond Seal is not a self cleaning product, but protects the surface from harsh chemicals and minerals that damage glass.

BENEFITS:

- Keeps shower glass panels looking new!
- Seals glass surface to prevent stains, fingerprints & more
- Simple maintenance
- Stay Clean for Longer
- No more harsh chemicals

Custom Oversize 90-Degree Shower Unit with Diamond Seal Coating Glass

GLASS OPTIONS

GLASS OPTIONS

PRL offers multiple glass options for your next shower glass project. You'll see which designs, sizes, and hardware you can get. Available complete systems we recommend in 3/8" and 1/2" glass thicknesses. We offer many types of glass, but Clear and Low Iron are our most popular. It will work great in all of your shower applications whether you choose a swing door enclosure, shower sliders, steam unit, or shower partition. See page 156 and 157 for tinted glass and reflective glass options.

Offers excellent visible light transmittance

TEXTURED GLASS

In some instances will require discrete privacy on shower and steam units. At PRL, we offer an alluring selection of textured and patterned shower glass to add privacy and elegance to sliding and swing shower door systems. Also excellent for steam units, restrooms stalls, splash panels and shower partitions, our textured and patterned shower glass has a lot to offer. Various 5/16" – 3/8" tempered glass patterns are available to choose from. A host of textured glass options and low iron glass patterns, we furnish an impressive array of premium quality heavy shower glass.

SPANDREL COLOR GLASS

For Exterior and Interior Applications

Custom Spandrel Color Glass

PRL Spandrel Glass with its nearly unlimited range of colors offers greatly increased options for interior and exterior glass applications. Color matching is no problem for PRL, using a computerized color spectrophotometer. Applicable on annealed or tempered, low iron, clear, and reflective glass products. Available in standard and custom colors.

Spandrel Offers:

- Aesthetic
- High Durability
- Heat-treated
- Multiple-Applications
- Unlimited Color Options

White Spandrel Wall Cladded

FIRE RESISTANT GLASS

Think Clear. Think Big. Think Keralite.

Storefront System with Keralite Fire Rated IG Units

PRL Carries Keralite® Filmed or Laminated.

The best in class glass ceramic features:

- The largest extended-size glass ceramic available
- Lowest haze
- Highest color rendering index
- Fastest in the industry
- Superior Customer Service

LOW-E GLASS

Specialize in Custom and Oversized Glass

Oversized Fixed Tempered Glass Panels with Low E Glass

INSULATED GLASS

Total Energy Performance Product that Translates into Reduced Energy Cost and Increased Comfort

IG Units with Low E Glass

PRL IG Units are a high quality, total energy performance product that translates into reduced energy cost and increased comfort. Insulated glass helps maintain inside room temperatures while saving energy.

IG Unit line capabilities

- Max. Sizes 98"x 137"
- Min. Size 6" x 6"
- Lead-times are 2 to 3 working days
- 24-hour service available upon customer's request
- Thickness from 1/2" to 1 1/2"

TEMPERED GLASS

Unlimited Glass Applications

Tempered glass is always much more resistant to breakage than raw glass. Even if it breaks, the glass disintegrates into relatively small pieces, which is less likely to cause a serious injury. It is very common for glass doors, sidelites, balconies, etc.

Oversize tempered glass available for 110" x 189"

*Consult PRL for details.
