

FINAL INSPECTION

Use this checklist to confirm that the installation is complete and compliant with quality and safety standards. Mark each item once verified.

Door Operation

- ☐ Door opens, closes, and latches smoothly without obstruction.
- ☐ Vertical and horizontal alignment confirmed; no hinge binding present.

Frame & Jambs

- ☐ Frame is plumb, level, and securely fastened.
- ☐ All screws, hinge screws, and grub screws are properly tightened.
- ☐ Adjustable jambs are correctly positioned and locked in place.

Glass Installation

- ☐ Glass panel is seated on setting blocks and properly centered.
- ☐ Shims are correctly placed, with no visible stress points on the glass.
- ☐ Perimeter sealant is continuous, fully adhered, and free of voids or gaps.
- ☐ Glazing stops or retainers are reinstalled and fully engaged.
- ☐ Door operates without glass-to-frame contact.

Weatherproofing

- ☐ All weather seals are installed and provide continuous perimeter contact.
- ☐ Sealant lines are uniform, smooth, and properly tooled for a watertight finish.

Hardware & Fasteners

- ☐ Handle, lock, and latch function correctly.
- ☐ All fasteners are secure and there are no loose components.

Finish & Cleanliness

- ☐ Glass panel is clean, free of adhesive residue or fingerprints.
- ☐ Frame surface is clean and undamaged.
- ☐ Work area is free of tools, debris, and installation materials.
